

Volodymyr Batyuk

Biography

10/17/1956 - was born in the city of Zhytomyr, Ukraine

1963 - 1973 - graduated from high school 12 with a specialization in teaching English, including English and American literature, technical translation, Zhytomyr

1973 - 1978 - graduated with honors from the Polesky National University, Zhytomyr

1979-1980 - graduated with honors from the Higher Courses of Cryptography of the General Staff of the USSR Armed Forces (linguistics, semantic analysis)

1981-1983 - studying under the PhD program at the Council for the Study of the Productive Forces of the Academy of Sciences (SOPS AN). Defended the thesis.

1984-1986 - Researcher at SOPS Academy of Sciences

1986-1995 - Head of Department at the Research and Production Association Gorsistemotekhnika, Kyiv, Deputy Director of the Research Institute of the city of Kyiv, Director of the Innovation Commercial Fund of Kyiv

1995 - 1996 - leading specialist of the Ministry of Agriculture and Food of Ukraine

1996 - 2001 - commercial representative of a German company in Ukraine and Central Asia

2002 - 2016 - individual entrepreneur, private teacher of English

2016 - present - private English teacher

I never wrote or spoke publicly about my attitude to politics.

I can't use Facebook and other social networks. My namesake from Moscow, Vladimir (Igorevich) Batyuk, is a doctor of historical sciences and regularly writes critical articles about US politics. Facebook and other social networks block him, and along with me. Therefore, I only use the Telegram network.

Qualifications and information

PhD in Economics (statistical mathematics), cryptographer, programmer (courses).

Experience

I have 25 years of experience developing theory and teaching reflexive language morphology. My reflexive teaching method ensures fast and lasting mastery of the English language.

My method has gone through several stages of development, from the System of Compulsory Words and Derivatives with a web application, to Dialogues = Examples with a mobile application, the System of Tenses and the System of Irregular Verb. Each new stage was characterized by an increase in the effectiveness of training.

I have trained over 350 people with consistent success. One of my students, who failed in French at school, became so proficient in English that she became an FAO national consultant. (<https://www.amr.space/index.php/home/contacts/100-experts/11-t-harkavenko>).

I have conducted over 1,500 reflexive system of English proficiency tests in schools, universities and companies. On this basis, I can say that only 5-6% of Ukrainians with higher education can speak English.

I developed an algorithm for a web application and a mobile application for using the reflexive system of the English language in the educational process.

I have a general knowledge of many programming languages, in particular PHP, Python, Java, JavaScript, C#, MySQL databases, DB Browser (SQLite), Swift, etc. I have created programs for using the reflexive system for educational purposes for a web application and for a mobile application.

Activities and achievements

American experts issued a Patent for a Reflexive System called Dictionary of an alphabetic foreign language (5,934,708). They recognized that the system is a technical device. Over many years of teaching practice, I have established all the necessary and sufficient conditions for such use of the System, which ensure the implementation of the effect of a technical device, accurate and solid knowledge of the language being studied. It should be noted that reflexivity, as the main property of the language, is also patented in the European Union, Japan and Russia.

The Ministry of Education of Ukraine issued a recommendation for the publication of the first version of the reflexive system of the English language in 2000 under the stamp of approval of the Ministry. Since then, I have not applied to this institution and do not maintain contact with its employees.

I participated in several teacher conferences dedicated to teaching English and other foreign languages in Kyiv. I have publications in local newspapers, scientific and commercial journals.

As the author of reflexive (reverse) morphology, I tried to present my theory in English-language linguistic journals. However, the editors always refused to publish. My theory doesn't disprove anything. It greatly complements the understanding of the language and expands the language capabilities of each person.

Lecture "The reflexive language system as an object and subject of programming" at a seminar at the Institute of Program Systems of the Academy of Sciences of Ukraine (Director of the Institute and leader of the seminar - academician Andon F.I., 2020).

Awards and achievements

Winner of the All-Union competition of scientific student works in the Logic section. Diploma of the 1st degree (1978).

Candidate's CV

Job

Private English teacher. Freelancer, collaborating with the Salam language school, Kyiv, Ukraine
